## **Job description**

### **Macro News Analyst**

Location: Primarily Remote

Type: Part-time (20 - 30 hours a week)

#### **Who we are:**

PredictIntel is a start-up company led by seasoned executives that is introducing a new information service that consolidates a wide array of information to provide clients with a view of the future that is not accessible today. Our team includes leading executives from the data analytics, technology, legal and government fields.

#### **Your Role:**

- You will research, monitor, and evaluate strategic macro news from governments, private-sector companies and other sources. Macro news means news about events or forecasts concerning or having an impact on the international, national, or regional economies or markets.
- You will monitor the daily news cycle for news with a possible macro impact and significant geopolitical news
- You will write and edit headlines, descriptions and summaries that convey information clearly and succinctly
- You will help develop ways to summarize and deliver new types of qualitative data/information
- You will interact and collaborate with sector-specific analysts
- You will be part of a growing team innovating as the service and analytics expand in scope
- You will assist in research and analysis projects as required

#### **Who You Are:**

You are passionate and curious about business & geopolitical news and information, especially news and information of value to investors and corporate decision-makers. You can quickly absorb and summarize information. You have a keen interest in public policy, economics, the financial markets, and business strategy. You seek news and information from multiple sources, and not just from TV and social media. You enjoy innovation and being a key part of a team building new products and services. You are detail oriented and work well with others. You have excellent interpersonal skills.

#### **Who You Will Work With:**

You will work with the team leading the Data Operations group and sector specific analysts. You will also work with our machine learning team as we continually enhance our automation capabilities.

#### **Your Preferred Skills & Experience**

- Undergraduate degree in economics, finance, business, international relations or government, with a strong academic record
- Work experience with data responsibilities preferred
- Ability to read critically, and to write and edit headlines, descriptions and summaries
- Knowledge of corporations, finance, and the economy; interest in news and current affairs
- Ability to review data in detail
- Ability to work quickly to meet deadlines; ability to adapt to new guidelines
- A commitment to self-sufficiency and the ability to work as part of a remote team.

We are an equal opportunity employer and value diversity at our company. We do not discriminate on the basis of race, religion, color, national origin, gender, sexual orientation, age, marital status, or disability.

Job Type: Part-time with possible consideration for Full-Time status based on performance.
